

FINE LINES
Granite & Quartz

Fine Lines Granite and Quartz Ltd

Care & Use

Maintaining your quartz is simple and easy.

- For every day cleaning use a soft sponge or dishcloth with warm water.
- For stubborn or greasy clean-ups use a gentle liquid cleaner like Mr. Clean, 409, Simple Green, Fantastic etc. or ordinary dish washing detergent e.g. Palmolive with warm water and a "White Scotch Brite" Never use red or green Scotch Brites on Quartz as they contain aluminum oxide (the same abrasive in sand paper) and may dull Quartz's finish. Do not use abrasive cleaning agents such as regular Comet and Ajax.
- There is no need to seal your Quartz countertop. Eventually the sealer will start to wear off unevenly in high use areas causing the polish to appear inconsistent.
- Quartz is scorch resistant and under normal conditions is not affected. Always use a trivet or hot pad between Quartz and any heat generating device including but not limited to crock pots, deep fryers, hot pots and pans or electric skillets. Sudden or rapid change of temperature or sustained heating, especially near edges and cut outs, may create enough thermal expansion energy to cause your countertop to crack. Damage caused by thermal expansion is not covered under the Quartz warranty.
